Professional Summary

Full Stack Developer with 3 years of hands-on experience designing, building, and deploying scalable web and mobile applications. Skilled in both front-end and back-end development, cloud infrastructure, API design, and database management. Adept at problem-solving, leading small teams, and collaborating with cross-functional engineers. Seeking to leverage technical expertise and leadership ability to contribute as a Senior Software Engineer (Full Stack).

Core Skills

- Full Stack Development: JavaScript (Node.js, React.js), Python
 - Mobile Development: React Native
 - Cloud & DevOps: AWS, Docker, CI/CD (GitHub Actions)
 - Databases: MongoDB, PostgreSQL
 - API Development: RESTful APIs, third-party integrations, payment gateways
 - Web Technologies: HTML, CSS, Tailwind
 - Agile/Scrum methodologies, project collaboration, and leadership
-

Work Experience

Full Stack Developer

Freelance / Projects (Abeokuta, Remote)

2023 – 2025

- Designed, developed, and deployed full-stack applications using Node.js, React.js
- Built and integrated RESTful APIs for data exchange between systems and third-party platforms.

- Deployed applications on AWS cloud, configured resources, and automated deployments.
 - Implemented secure and scalable databases using PO and MongoDB.
 - Led small project teams, collaborated with UI/UX designers and IoT engineers to deliver solutions.
 - Optimized application performance, identified bottlenecks, and resolved critical bugs.
-

Education

Currently pursuing B.Sc.

Certifications

- Codecademy: Full stack development
-

Projects

- **PFOS (Project Fulfillment & Order System):** A full-stack system for managing orders and fulfillments, built with React, Express.js, and MongoDB. You led both front-end (responsive UI with Tailwind CSS) and back-end (Node.js APIs), aimed at a solar company to boost online engagement and sales.
 - **Fashion Designer Client & Measurement System (Fittingz):** A client management tool for fashion designers, using React, Express.js, and PostgreSQL to handle measurements, orders, and client data.
 - **Altair Attic:** A clean, responsive company website built with React.js to enhance branding, improve user retention, and attract more clients with a modern, professional design.
 - **Verizone:** Front-end landing page and scalable web app structure for property reports, using HTML5, CSS3, JavaScript, and React.js. You collaborated with interns on the UI, setting up a foundation for future features.
